

EVI

The High-Low chair for children

EVI is a customizable chair that offers the support a child needs to sit independently, comfortably and for longer periods of time. Seat height is adjustable from floor to table height and the chair is easily adjusted while occupied. The large wheels are easy to roll, which makes maneuvering EVI a breeze for both child and assistant.

The chair in the pictures has optional equipment

Activity & Recovery

The standard EVI chair comes equipped with a stepless gas spring seat tilt. It is easy to adjust and makes both active and passive positions a possibility. This makes EVI useful for a range of activities, including playing with toys or eating.

Easy to adjust

Standard EVI equipment

- Armrests, adjustable in height and width
- Seat unit, adjustable in height, width and depth
- Four easy-to-roll wheels with individual brakes
- Gas springs for both height and tilt adjustment, ensuring smooth motion
- Foldable foot rest
